DEL PROYECTO.**

Proyecto: EDUCATION "HATI KUDUS"

Lugar de ubicación del proyecto: **Kampung Blok Beas, Bandung,**

	Indonesia
3. PERSONA DE CONTACTO.	Hna Romeka Situmorang
4. DESCRIPCION Y FINES DEL PROYECTO.	<p>INDICADORES SOCIALES: EDUCACIÓN, SANIDAD, SITUACIÓN SOCIAL, DATOS DEMOGRÁFICOS, ETC.:</p> <p>The Kampung is surrounded by the poor in which about 99% are Muslim. Family Visitation is starting point for us to know the reality of the people. We discovered that this Kampung is overpopulated and the majority are children. They are immigrants from different regions of Indonesia and different cultures. The percentage of early marriages of youth between 13 to 15 is very high. Muslim men are allowed to have several wives and violence against women happens often within the home. Economically high unemployment exists. The residents have low and irregular incomes as house maids, vendors, market workers, scavengers, drivers (not owning the vehicle). The majority of residents are renters of small, one room accommodations with only public toilets, no water supply and a lack of open space for children to play outdoors. Education is not that important for them; therefore there are many students who are drop out. Many children from poor families use to spend their time working with their parents to earn some money. They did not go to school because their parents could not afford to pay the school fees and lack of motivation. Sometime they work as cheap labors in different factories or market. Many women stay idel because of their limitation of skills that can improve their economic situation. People lack initiative and motivation to overcome poverty; therefore, they are stuck in the vicious circle of poverty.</p> <p>We started to gather the young children for informal education and children of elementary, junior and senior high school for tutorial classes and scholarship program in the year 2000. While the Kindergarten in 2008. It was not easy for us as there was a lot of fears due to Christianization. Through dialogue and untiring effort they understood our sincere motive and are very grateful for what they have received.</p> <p>Specific needs of target beneficiaries</p> <p>Despite the increasing number of those who are graduated from Senior High School, a qualified education is still one of the needs of the people in this area so that they may develop their human potential and capacities. The educational awareness has to be started since childhood. To offer better quality of education the Kindergarten needs more qualified teachers and different facilities. The young children need to acquire basic knowledge before they begin elementary school. The students on scholarship need school supplies and monthly school fees. They also need tutors on different subjects which cannot be offered by their parents who did not have opportunity to study. To grow healthy they also need the nutrition. They need a space to study and opportunity to be with their mates instead of working with their parents. They need to learn the reality of the world that is bigger than themselves through the love of reading,</p>

computer training, skill training. Therefore we provide library, computer training, sewing machine, materials and resource person. They need the educations of values to help them to live better and happily. It is necessary to accompany and encourage continually the children and also their parents so that less children drop out from their study. The parents especially the women need skill to improve their quality of life instead of just staying idel to wait for their children.

PROYECTO:

- a). Anak-anak Henriette Scholarship Program
- b). Tutorial – Anak Harapan Coudrin Program
- c). Kindergarten – Taman Belajar dan Bermain
- d). Parenting Program
